The Power of Blue.®

Prior Big Blue 302 owners now have a choice between the Big Blue 400 or the Big Blue 300 Pro.

Engine gauges standard on all models indicate engine oil pressure, coolant temperature.

Designed for fleet owners that demand the ultimate in reliability and performance.

Enclosed robust case design protects internal components from impact and allows air flow to cool and prolong the life of the engine. Also reduces sound levels.

Quick and easy maintenance with single-side access to oil level check, oil fill, oil filter, fuel filter and air cleaner.

Remote toolless oil drain allows oil to be drained without getting under the engine and reduces the chance of oil spillage.

CC/CV Models: The Vault—ultimate control board reliability. See page 3.

BUILT TOUGH

Heavy duty industrial engine choices designed, built and proven to operate over 10,000 hours before the first basic overhaul.

Big Blue 500
CC/CV Deluxe Model

Fuel gauge

- Hour meter function
- Oil change interval
- High coolant temperature and low oil pressure shutdowns
- Low fuel shutdown—engine shuts down before system runs out of fuel, making restarts easy.

Arc-Drive makes welding easy. Automatically enhances Stick welding, especially on pipe, by focusing the arc and preventing the electrode from going out.

Hot Start™ provides positive Stick electrode starts making it easy to start all types of electrodes and it also works great for bead tie-ins.

Weatherproof Lexan® nameplate resists cracking and fading, and is color-coded for ease of operation.

GFCI receptacle as required on most job sites to protect operators from electrical hazards.

CSA and NEMA compliant for welders. Degree of protection provided by enclosure IP23.

TRUE BLUE®

3YR. WARRANTY

The Vault — Superior Circuit Board Design
Miller's critical circuit boards are engineered to carry *low power* and *low heat* to reduce

thermal stress and minimize expansion and contraction. In contrast, our competitor's boards carry *high power* and *high heat*, making them more vulnerable to failure.

“The Vault” Makes Upgrading to Miller CC/CV Units Worry-Free

Concerns with circuit board reliability have resulted in some operators steering clear of CC/CV welder/generators — even though they offer a superior arc and multiple welding processes. Miller's circuit board reliability isn't a concern since all Big Blue multiprocess industrial engine drives feature the Vault.

Created out of two aluminum halves sealed with silicone, as well as watertight harness connections, the Vault provides a clean circuit board environment, protecting the electronics — and controlling output — in heavy industrial applications. No other competitor protects their electronics with a sealed vault, leaving critical circuit boards exposed to harsh elements that can disrupt the machine's electronics, and therefore, its operation.
